

1. As a traveler, I want the Spotify playlist generator app to use my current geographic location to create a playlist that reflects the local music scene. For example, if I'm in New Orleans, I want the app to generate a playlist with jazz, blues, and funk music.
2. As a person who enjoys listening to music while walking, I want the Spotify playlist generator app to create a playlist that's tailored to my location and the current weather conditions. If I'm in the park on a sunny day, I want the app to create a playlist with upbeat, energetic music that matches the weather of where I am.
3. As a busy student, I want to be able to sign in to the application conveniently, and authenticate my account using whichever method I normally use to sign in to Spotify.
4. As a person who gets easily bored of the same music, I want to be able to generate multiple different playlists, even if I am generating them in the same location.
